BASIC CONCEPTS OF SIDELINE WIDE BALL LEVEL TRAIL

- SIDELINE WIDE / BALL LEVEL CONCEPT gives you much better coverage than ever before!! It is time for a change as the game is changing rapidly. Here are some thoughts:
 1. Player Separation - you will always see the point of contact
 2. 3pt Shot Line Concept - you will not miss a 3-point shot attempt
 3. Dribble Drive to the Basket - Keeping Connection & staying Engaged to the play you will continue to see the separation into the Lead Primary
 4. Improved Off Ball Coverage and Off Ball Fouls - will happen right in front of you in your primary
 5. Rebounding Displacement - keeps you right on the play

FURTHER DETAILS ON SIDELINE WIDE BALL LEVEL TRAIL

- Work the Trail Position much like the Center Position (Sideline Wide). Encourage two C's both at FT Line extended if ball location dictates it.
- Stay Ball Level Sideline Wide for angles on separation on offensive and defensive players.
- Our goal is when we watch film of our game, or see it on TV, we WANT TO SEE ALL 3 POSITIONS ON THE FILM OR IN THE PICTURE.
- We would much rather be down deep looking out at the angle of separation rather than out at half court area seeing nothing but the numbers on the offensive players back.
